Index to

Aerospace Engineering, Volume 19

January–December, 1960

Subject Index (See also Author Index, page 126)

	Month	Page
ACCESSORIES & COMPONENTS		
Analytical and Environmental Cooling Specifications for Airborne Electronic Equipment, Alvin R. Saltzman	*Aug.*	38
Design Features of the B-58 Escape Capsule, Robert M. Stanley	*Jan.*	42
Thermal Application of Catalytic Chemical Kinetic Theory, Alvin R. Saltzman	*June*	28
AERODYNAMICS		
Aerodynamic Effects in Planetary Atmospheres, Zdeněk Kopal	*Dec.*	10
Aerodynamically Heated Surfaces—A Chemical Analysis, Howard Myers	*Feb.*	34
Atmospheric Entry of Manned Vehicles, Carl Gazley, Jr.	*May*	22
The Discus Body and Its Application to V/STOL Aircraft and Space Vehicles, Martin Gerloff	*Jan.*	51
Empirical Relationships for Jet-Flap Lift and Drag Prediction, D. J. Blakeslee	*Nov.*	12
Flight Dynamics of Large External Stores, Arnold P. Schaffer	*Feb.*	39
Flutter Testing the 880 in a Transonic Wind Tunnel, Andrew Mac Lellan	*Apr.*	37
A New Modified Acceptance Criterion for Lateral-Directional Flying Qualities, Robert M. Crone and Ralph C. A'Harrah	*Sept.*	24
Sonic Boom—Limitations on Supersonic Aircraft Operations, Donald W. Patterson	*July*	20
Surface Effects on Materials in Near Space, Francis J. Clauss	*Oct.*	16
COMMUNICATIONS		
Project Score—The First Satellite Communication System, George V. Kedrowsky	*Oct.*	36
Space Reconnaissance, Kermit L. Sandefur	*Nov.*	28
EDITORIALS		
The Aerospace Technology Panels	*Mar.*	39
Can Free Enterprise Launch Space Platforms?, Simon Ramo	*May*	15
Cooperation vs. Competition (II)	*Nov.*	5
IAS International	*Oct.*	15
Institute of the Aerospace Sciences	*Aug.*	25
A New Look for the Staff of the IAS	*June*	17
New Publishing Program	*Sept.*	15
A New VGM	*Feb.*	27
Operation Face-Lift	*Dec.*	9
A Policy Statement	*Apr.*	30
What Price Originality	*Jan.*	31
Where do we go from here..?	*July*	14
ELECTRONICS & ELECTRICAL EQUIPMENT		
Analytical and Environmental Cooling Specifications for Airborne Electronic Equipment, Alvin R. Saltzman	*Aug.*	38
A Circulating Dust-Fueled, Radiation-Cooled Space Power Reactor, W. R. Corliss	*May*	60
Electric Propulsion for Space Flight, William R. Mickelsen	*Nov.*	6
Project Score—The First Satellite Communication System, George V. Kedrowsky	*Oct.*	36
Thermal Application of Catalytic Chemical Kinetic Theory, Alvin R. Saltzman	*June*	28
FUELS		
Cryogenic Propellant Storage for Round Trips to Mars and Venus, George R. Smolak and Richard H. Knoll	*June*	42
GROUND EFFECT VEHICLES		
Potential of the Air-Cushion Vehicle, Roy P. Jackson and Murray F. Southcote	*Mar.*	40
Preliminary Flight Experiments With the Princeton University 20-Ft. Ground Effect Machine, W. B. Nixon and T. E. Sweeney	*Apr.*	32
GUIDANCE & CONTROL		
Anticipating Anti-Skid System, Frederick L. Ryder	*Nov.*	24
Ascent Guidance for a Satellite Rendezvous, T. B. Garber	*May*	74
Attitude Control of a Space Vehicle by a Gyroscopic Reference Unit, Marvin L. Chatkoff and Lewis G. Lynch	*May*	66
Attitude and Flight Path Control System for a Space Station Supply Vehicle, J. Stalony-Dobrzanski and O. Imai	*May*	68
Comparison of Some Actuation Methods for Attitude Control of Space Vehicles, Walter Haeussermann	*May*	64
Graphic Presentation of Optimum Flight Profiles, Donald W. Richardson	*Sept.*	16
A Guidance Technique for Achieving Rendezvous, Philip G. Felleman and Norman E. Sears, Jr.	*May*	76
Helicopters and VTOL Aircraft: Criteria for Control and Response Characteristics in Hovering and Low-Speed Flight, Robert J. Tapscott	*June*	38
The Integrated Crew-Computer Team—Its Role in the Supersonic Transport, Donald W. Richardson	*Dec.*	16
Manned Control of Orbital Rendezvous, E. Levin and J. Ward	*May*	78
Orbital Rendezvous and Guidance, Ernst A. Steinhoff	*May*	70
Problems in Attitude Stabilization of Large Guided Missiles, Ernst D. Geissler	*Oct.*	24
Rendezvous in Space—Effects of Launch Conditions, Norman V. Petersen and Robert S. Swanson	*May*	72

HEATING

Evaluation of Thermal Problems at Relatively Low Orbital Altitudes, Lawrence D. Wing..... *Mar.* 58

HELICOPTERS

Potential of Helicopters and VTOL Aircraft, Bartram Kelley..... *Mar.* 61

HUMAN FACTORS

An Algae Life Support System, Russel O. Bowman and Fred W. Thomae..... *Dec.* 26
Atmosphere Control, Carey B. Jackson, George R. Roush, Jr., M.D., and Robert M. Bovard..... *May* 40
Design of an Operational Ecological System, Eugene B. Konecci and Neal E. Wood..... *May* 42
Gravity Problems in Manned Space Stations, Carl C. Clark and James D. Hardy..... *May* 36
Manned Nuclear Space Systems. Part I—High-Thrust Nuclear Systems, E. B. Konecci, R. F. Trapp, and M. W. Hunter..... *Jan.* 34
Manned Nuclear Space Systems. Part II—Low-Thrust Nuclear Systems, R. F. Trapp, M. W. Hunter, and E. B. Konecci..... *Feb.* 49
Maximum-Effort - Minimum-Support Simulated Space Flights, George T. Hauty..... *Apr.* 44
Selection of Personnel for Manned Space Stations, Romney H. Lowry, M.D..... *May* 32
Work and Living Space Requirements for Manned Space Stations, Fred A. Payne..... *May* 34

MATERIALS

Meteoroid Shielding for Space Vehicles, David Rodriguez..... *Dec.* 20
Refractory Materials. Part I—Technology and Low-Temperature Behavior, Robert I. Jaffee and Daniel J. Maykuth..... *June* 22
Refractory Materials: Part II—High-Temperature Behavior, Robert I. Jaffee and Daniel J. Maykuth..... *July* 39
Rocket Motor Case Material Evaluation by Pressure Vessel Testing, C. W. Haynes and P. J. Valdez.... *Dec.* 30
Surface Effects on Materials in Near Space, Francis J. Clauss..... *Oct.* 16

NUCLEAR

A Comparison of Nuclear and Solar Power Systems for Manned Space Stations, William C. Cooley.... *May* 54
Sizing Gas-Cooled Reactor Cores—A Simplified Method for Thermodynamic Requirements, Thomas G. Flock..... *Dec.* 14

PROPULSION

Application of Air-Breathing Jet Engines to High Mach Number Vehicles, M. Arens..... *Aug.* 26
A Comparison of Nuclear and Solar Power Systems for Manned Space Stations, William C. Cooley.... *May* 54
Controlled Radial Energy Gradient in Axial Flow Compressors, Lt. Col. Edward M. Rex, USAF.... *Oct.* 22
Current Trends in Large Booster Developments, Eldon W. Hall and Francis C. Schwenk..... *May* 20
Electric Propulsion for Space Flight. William R. Mickelsen..... *Nov.* 6
Integrated Thermodynamic Systems for Manned Space Stations, Michael G. Del Duca, Andrew D. Babinsky, and Floro D. Miraldi..... *May* 56
The Long-Time Satellite Rendezvous Trajectory, Louis W. Spradlin..... *June* 32
The Multistaged Shaped Charge Projection Technique, Marvin W. Burnham..... *Dec.* 24
On Optimum Rocket Trajectories and the Calculus of Variations, R. M. Rosenberg..... *Oct.* 20
Optimum Rocket Trajectories. Part I—Initial Value Variational Solutions, Daniel O. Dommasch and Roger L. Barron..... *Jan.* 46
Optimum Rocket Trajectories. Part II—Generalized Boost Analysis, Daniel O. Dommasch and Roger L. Barron..... *Feb.* 45
Pebble Bed Nuclear Reactors for Space Vehicle Propulsion, Myron M. Levoy and John J. Newgard... *Apr.* 54
Simulated Flight Testing of a Cowled Turbojet Engine by Use of an Exhaust Ejector, J. C. Armstrong, R. W. Flados, and W. T. McKenzie..... *Nov.* 16
Utilization of Plasma-Cell Energy Conversion in Nuclear Reactors, William A. Ranken and Thurman G. Frank..... *May* 58
Zero Gravity Mercury Condensing Research, John G. Reitz..... *Sept.* 18

RELIABILITY

The Distribution of the Dynamic Life, L. V. Toralballa..... *Jan.* 57
The Long-Time Satellite Rendezvous Trajectory, Louis W. Spradlin..... *June* 32
On Optimum Rocket Trajectories and the Calculus of Variations, R. M. Rosenberg..... *Oct.* 20
Optimum Rocket Trajectories. Part I—Initial Value Variational Solutions, Daniel O. Dommasch and Roger L. Barron..... *Jan.* 46
Optimum Rocket Trajectories. Part II—Generalized Boost Analysis, Daniel O. Dommasch and Roger L. Barron..... *Feb.* 45

RESEARCH

The Military Test Space Station, Col. Lowell B. Smith, USAF..... *May* 18

SIMULATION

Space Flight Simulators—Design Requirements and Concepts, R. O. Lowrey..... *Oct.* 50

SPACE PHYSICS

Nomograms for the Solution of Orbital Parameters, George E. Townsend, Jyri Kork, and J. Donald Kraft..... *Dec.* 12

STRUCTURES

Heat Protection by Ablation, Robert M. Wood and Ronald J. Tagliani..... *July* 32
Inflatable Manned Orbital Vehicles, J. W. Carter and B. L. Bogema..... *May* 48
The Ionizing Radiation in Space—Structural Implications, Norris F. Dow..... *May* 46
Meteoroid Shielding for Space Vehicles, David Rodriguez..... *Dec.* 20
Meteoroids—Implications for the Design of Space Structures, Lloyd E. Kaechele and Arnold E. Olshaker..... *May* 44
Prediction of Flexibility and Natural Modes of Low Aspect Radio Wings Using Stiffness Matrices, Robert J. Melosh and Richard G. Merritt..... *July* 25
Rocket Motor Case Material Evaluation by Pressure Vessel Testing, C. W. Haynes and P. J. Valdez.... *Dec.* 30
The Role of Damping in Space Structures, Charles W. Coale..... *May* 50
Sandwich Cylinders. Part I—State of the Art and Advantages of Sandwich Construction, M. I. Kazimi..... *Aug.* 32
Sandwich Cylinders: Part II—Uniformity of the Mechanical Properties of the Core, M. I. Kazimi.. *Sept.* 34

The Statistical Basis of Loading Spectra for Fatigue Design Criteria, Innes Bouton ... *Mar.* 53
Surface Effects on Materials in Near Space, Francis J. Clauss ... *Oct.* 16
Thermal Control of Space Vehicles—Structural Approach, Peter E. Glaser ... *May* 52

SUPPORT

Support Systems: Part I—Scope and Techniques, Beal M. Teaque ... *July* 16
Support Systems: Part II—State of the Art, E. Wesley Landsman ... *Sept.* 30
Support Systems: Part III—In the Future, Richard W. Skulski ... *Nov.* 32
TM-76 Mace Landing Mat Design, Kenneth Idomir. *Feb.* 28

SYSTEMS

A Circulating Dust-Fueled, Radiation-Cooled Space Power Reactor, W. R. Corliss ... *May* 60
Design Criteria and Their Application to Economical Manned Satellites, H. Hermann Koelle, Erich E. Engler, and John W. Massey ... *May* 24
Electric Propulsion for Space Flight, William R. Mickelsen ... *Nov.* 6
Integrated Thermodynamic Systems for Manned Space Stations, Michael G. Del Duca, Andrew D. Babinsky, and Floro D. Miraldi ... *May* 56
Manned Scientific Orbital Laboratory, M. Stoiko, G. G. Kayten, and J. W. Dorsey ... *May* 26
Manned Space Flight—Present and Future Steps, Robert R. Gilruth and H. Kurt Strass ... *May* 16
Mercury Capsule and Its Flight Systems, Maxime A. Faget and Robert O. Piland ... *Apr.* 48
A Modular Concept for a Multimanned Space Station, Saunders B. Kramer and Richard A. Byers ... *May* 30
Simulated Flight Testing of a Cowled Turbojet Engine by Use of an Exhaust Ejector, J. C. Armstrong, R. W. Flados, and W. T. McKenzie ... *Nov.* 16
Some Factors Influencing the Selection of a Manned Space Station Concept, Joseph H. Doss and Leo J. Montague ... *May* 28
Support Systems: Part I—Scope and Techniques, Beal M. Teague ... *July* 16
Support Systems: Part II—State of the Art, E. Wesley Landsman ... *Sept.* 30
Support Systems: Part III—In the Future, Richard W. Skulski ... *Nov.* 32
The Use of Chemical Power Systems in the Construction, Servicing, and Operation of Manned Space Stations, H. J. Howard and R. M. Laughlin ... *May* 62
Utilization of Plasma-Cell Energy Conversion in Nuclear Reactors, William A. Ranken and Thurman G. Frank ... *May* 58

UTILITY & ECONOMICS

Economic Aspects of Developing and Orbiting a Space Station, Milton A. Margolis ... *May* 84
Man's Contribution to an Operational Space Station Concept, M. A. Grodsky and R. D. Sorkin ... *May* 80
Program Costs for a Manned Space Station, R. H. Lundberg and T. E. Dolan ... *May* 82
Satellite Astronomical Observatories, Nancy G. Roman ... *May* 86

VEHICLE DESIGN

Design of Jet Transports With Rear-Mounted Engines, D. J. Lambert ... *Oct.* 30
Meteoroid Shielding for Space Vehicles, David Rodriguez ... *Dec.* 20
Parametric Weight Study of a Manned Space Entry Vehicle, Onys A. Kelley, Jr. ... *Oct.* 40
Performance and Design Considerations for Maneuvering Space Vehicles, L. W. Warzecha ... *Nov.* 18

VIBRATION & FLUTTER

Flight Dynamics of Large External Stores, Arnold P. Schaffer ... *Feb.* 39

VTOL-STOL

Helicopters and VTOL Aircraft: Criteria for Control and Response Characteristics in Hovering and Low-Speed Flight, Robert J. Tapscott ... *June* 38
Potential of Helicopters and VTOL Aircraft, Bartram Kelley ... *Mar.* 61
Propeller Effects on the Stability and Control of VTOL Aircraft, Henry E. Payne, III ... *Mar.* 48

Author Index

A'Harrah, Ralph C., and Robert M. Crone. A New Modified Acceptance Criterion for Lateral-Directional Flying Qualities ... *Sept.* 24
Arens, M. Application of Air-Breathing Jet Engines to High Mach Number Vehicles ... *Aug.* 26
Armstrong, J. C., R. W. Flados, and W. T. McKenzie. Simulated Flight Testing of a Cowled Turbojet Engine by Use of an Exhaust Ejector ... *Nov.* 16

Babinsky, Andrew D., Michael G. Del Duca, and Floro D. Miraldi. Integrated Thermodynamic Systems for Manned Space Stations ... *May* 56
Barron, Roger L., and Daniel O. Dommasch. Optimum Rocket Trajectories. Part I—Initial Value Variational Solutions ... *Jan.* 46
Barron, Roger L., and Daniel O. Dommasch. Optimum Rocket Trajectories. Part II—Generalized Boost Analysis ... *Feb.* 45
Blakeslee, D. J. Empirical Relationships for Jet-Flap Lift and Drag Prediction ... *Nov.* 12
Bogema, B. L., and J. W. Carter. Inflatable Manned Orbital Vehicles ... *May* 48
Bouton, Innes. The Statistical Basis of Loading Spectra for Fatigue Design Criteria ... *Mar.* 53
Bovard, Robert M., Carey B. Jackson, and George R. Roush, Jr., M.D. Atmosphere Control ... *May* 40
Bowman, Russel O., and Fred W. Thomae. An Algae Life Support System ... *Dec.* 26
Burnham, Marvin W. The Multistaged Shaped Charge Projection Technique ... *Dec.* 24
Byers, Richard A., and Saunders B. Kramer. A Modular Concept for a Multimanned Space Station ... *May* 30

Carter, J. W., and B. L. Bogema. Inflatable Manned Orbital Vehicles ... *May* 48
Chatkoff, Marvin L., and Lewis G. Lynch. Attitude Control of a Space Vehicle by a Gyroscopic Reference Unit ... *May* 66

CLARK, CARL C., AND JAMES D. HARDY. Gravity Problems in Manned Space Stations ..... *May* 36

CLAUSS, FRANCIS J. Surface Effects on Materials in Near Space ..... *Oct.* 16

COALE, CHARLES W. The Role of Damping in Space Structures ..... *May* 50

COOLEY, WILLIAM C. A Comparison of Nuclear and Solar Power Systems for Manned Space Stations .. *May* 54

CORLISS, W. R. A Circulating Dust-Fueled, Radiation-Cooled Space Power Reactor ..... *May* 60

CRONE, ROBERT M., AND RALPH C. A'HARRAH. A New Modified Acceptance Criterion for Lateral-Directional Flying Qualities ..... *Sept.* 24

DEL DUCA, MICHAEL G., ANDREW D. BABINSKY, AND FLORO D. MIRALDI. Integrated Thermodynamic Systems for Manned Space Stations ..... *May* 56

DOLAN, T. E., AND R. H. LUNDBERG. Program Costs for a Manned Space Station ..... *May* 82

DOMMASCH, DANIEL O., AND ROGER L. BARRON. Optimum Rocket Trajectories. Part I—Initial Value Variational Solutions ..... *Jan.* 46

DOMMASCH, DANIEL O., AND ROGER L. BARRON. Optimum Rocket Trajectories. Part II—Generalized Boost Analysis ..... *Feb.* 45

DORSEY, J. W., M. STOIKO, AND G. G. KAYTEN. Manned Scientific Orbital Laboratory ..... *May* 26

IAS PAPERS

CAI—IAS JOINT MEETING—MONTREAL, CANADA OCTOBER 17–18, 1960

IAS MEMBER PRICE, $0.50 NONMEMBER PRICE, $1.00

60-94 Some Techniques Used for the Ground Resonance Testing of Aircraft—Cyril E. Tammadge

60-95 The BLC Hercules—A Practical STOL Transport—F. N. Dickerman and C. F. Branson

60-96 Aerodynamics of the Gas Path in the PT-6 Engine—J. C. Vrana

60-97 Nonpropulsive Power Systems for Long-Time Applications—B. Lubarsky and R. E. English

60-98 Manufacture and Testing of Black Brant Engines—I. R. Cameron

60-99 An Air-Breathing Satellite Booster—S. Molder and J. H. T. Wu

60-100 Aerodynamics of Blasts—I. I. Glass

60-101 Development and Checkout of the NASA Mercury Capsule—G. B. North

60-102 Design of an Inlet Duct for the Propeller-Turbine Installation on a STOL Aircraft—D. H. Henshaw

60-103 Long-Range Communication with Aircraft—J. H. Meek

60-104 The Development of a Global Communications Satellite System—A. M. Levine

Order by number from: Special Publications Dept., IAS, 2 E. 64th St., New York 21, N.Y.

New IAS Special Publications

	Members	Nonmembers
Proceedings of the National Midwestern Meeting on Air Logistics, October 3–5, 1960, Tulsa, Okla.—116 pp.	$5.00	$10.00
Proceedings of the National Symposium on Hypervelocity Techniques, October 20–21, 1960, Denver, Colo.—176 pp.	$5.00	$10.00
Proceedings of the Symposium on Recovery of Space Vehicles, August 31–September 1, 1960, Los Angeles, Calif.—104 pp.	$4.00	$ 8.00
